## 20th Anniversary Edition

## Celebrating 20 Years of Service, Trust & Community

This month marks a major milestone for Time Savers Heating & Cooling—our 20th anniversary! From humble beginnings in a garage to becoming a trusted name across Loveland and the surrounding communities, our journey has been one of hard work, heart, and an unwavering commitment to doing things the right way.

It all started with a dream and a toolbox. Our founder, Doug Hyrne, launched Time Savers after gaining years of hands-on experience in residential and commercial HVAC. Fueled by a passion for helping people and a belief that customers deserve honesty, quality, and professionalism, what began as a one-person operation quickly grew through word of mouth, dependable service, and a deep connection to our community.

We've been here through snowy winters, scorching summers, and everything in between—and we couldn't have done it without you. Whether you've been with us since day one or just joined the Time Savers family this year, your support means the world to us.

This anniversary isn't just about celebrating the past—it's about looking forward. We remain committed to being the team you call when you need comfort, safety, and peace of mind in your home. As we grow, we'll continue to invest in our people, our training, and our technology—while never losing sight of the small-town service that built us.

Here's to 20 years of keeping you comfortable—and to many more to come.

With gratitude,

*Doug Hyrne*

# Highlights from May: Food, Fun & Frontier Spirit!

May was buzzing with energy, and Time Savers Heating & Cooling was right in the heart of it all! From delicious bites at the Loveland Food Truck Rally to the hometown charm of Milford's Frontier Days, we were proud to show up, support, and celebrate the communities we call home. Here's a look back at some of our favorite moments from the month:

## Loveland Food Truck Rally – A Taste of Summer!:

On May 10th, the Time Savers team joined the delicious fun at the 12th Annual Loveland Food Truck Rally at Shopper's Haven Plaza. With an amazing lineup of local food trucks, live entertainment, and families enjoying the sunshine, this event was the perfect way to kick off the season.

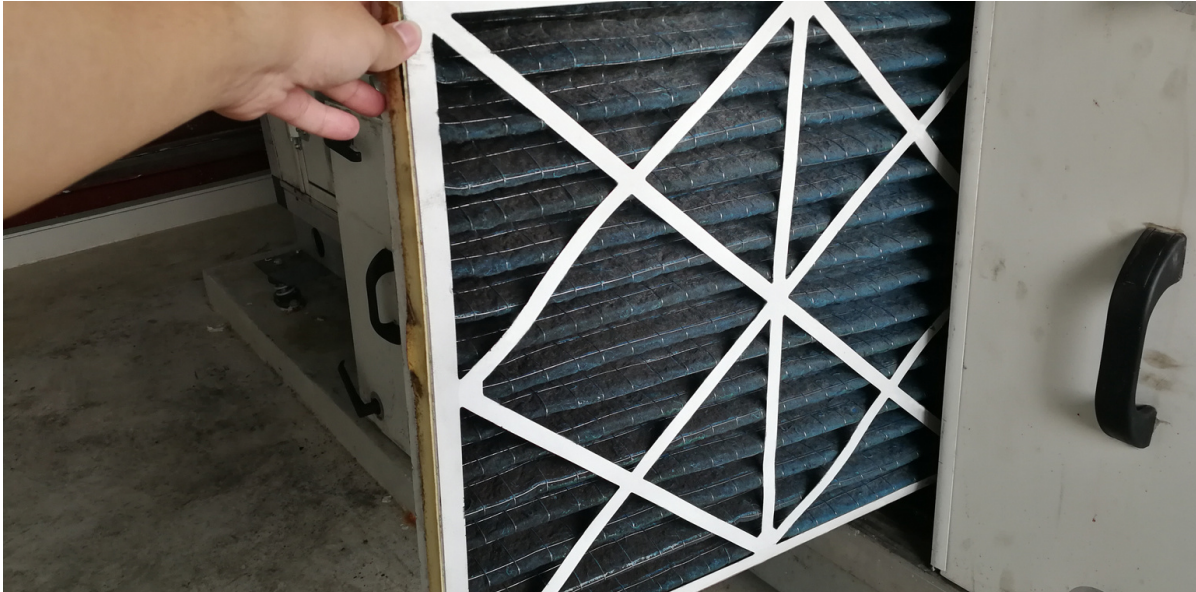

We loved connecting with familiar faces and new friends alike, handing out swag, chatting with neighbors, and soaking in the good vibes. Thank you to everyone who stopped by our booth—we're proud to be part of such a vibrant community that shows up hungry and happy every year!

## Milford's Frontier Days – Celebrating Tradition and Community:

From May 29th to 31st, we had a fantastic time celebrating 63 years of Milford's Frontier Days Festival at Riverside Park! This beloved tradition brought out the best of small-town spirit with a festive parade, live music, craft vendors, classic festival eats, and family fun for all ages.

Time Savers was excited to sponsor and participate in the celebration. We especially loved seeing the smiles at the dunking booth! Events like these remind us why we do what we do—it's not just about heating and cooling homes, it's about being part of the heartbeat of our community.

## June HVAC Tip: Show Your System Some Love—Change That Air Filter!

As summer temperatures climb and your air conditioner runs more frequently, one of the easiest ways to keep your system operating efficiently is to check and replace your air filter.

Over time, filters collect dust, pollen, pet hair, and other debris. When they become clogged, your system has to work harder to circulate air, which can lead to higher energy bills, reduced cooling performance, and unnecessary strain on your HVAC equipment. We recommend checking your filter every 30 days, especially during the peak cooling season. Most homes should replace their filter every 1 to 3 months, but if you have pets, allergies, or have had your AC running nonstop, you may need to do it more often. A clean filter helps ensure:

- Stronger airflow throughout your home**
- Cleaner, healthier indoor air**
- A longer-lasting HVAC system**
- Fewer breakdowns**
- More consistent comfort**

This small task can make a big difference in both your comfort and your energy costs. Not sure which filter your system uses or how to replace it? Reach out to us—we're always happy to help.
