Thank You for Making This Summer One to Remember!

As we reach the peak of summer, we want to take a moment to say one thing: **thank you.**

This season, we've seen an incredible wave of support from both loyal customers and new faces in the community—and it hasn't gone unnoticed. Thanks to your referrals, kind words, and trust in our team, we've welcomed a record number of new customers who chose Time Savers Heating & Cooling to keep their homes safe, comfortable, and cool.

Every time you recommend us to a neighbor, friend, or family member, it means the world to our small business. It's more than just a name passed along—it's a vote of confidence in the work we do and the way we care for our customers. We don't take that lightly.

Whether you've been with us for years or you just called us for the first time this summer, we're grateful you've chosen us to be there when it matters most. Your referrals and continued trust are helping us grow, serve more families, and stay true to our mission of being reliable, professional, and always just a phone call away.

From the bottom of our hearts, thank you for being part of the Time Savers family. We're honored to serve you.

July Recap: Celebrating Independence Day with Our Community

While July was a quieter month for events, it was filled with moments that reminded us just how grateful we are to be part of this amazing community.

The highlight of our month was proudly participating in the Loveland 4th of July Parade. We had so much fun waving to familiar faces, handing out goodies, and seeing everyone decked out in red, white, and blue. The energy, the smiles, and the sense of togetherness made it a day to remember. We're honored to represent a local business that values tradition, service, and hometown pride.

Beyond the parade, July gave us time to reflect on what matters most—serving our neighbors with honesty, reliability, and care. Whether it's keeping your home cool in the summer heat or showing up at community events, we're here for you. Thanks to everyone who supports us, refers us to friends, or simply takes the time to wave when they see our vans around town. Your trust means everything, and we're excited for what's ahead.

Customer Highlight: Thank you for your review!

"Outstanding service and super fast. They were able to come out the next morning to service our air conditioner that stopped working. Seth and Nathen were very friendly and professional. Quickly figured out the problem and did some preventative maintenance on both units. Both heat pumps look like new and running great. Highly recommend. Small company - big service!" - Jimmy

August HVAC Tip: Start Prepping for Fall - Your Furnace Will Thank You Later

It might still feel like summer outside, but August is the perfect time to start thinking ahead to the cooler months. As we head into the final stretch of summer, your HVAC system has likely been running hard—and now is the ideal time to give it the attention it needs before fall arrives.

At Time Savers Heating and Cooling, we believe in staying ahead of the seasons. That's why our August HVAC tip is simple: schedule your fall maintenance now!

Why Plan Ahead?:

Once the first chilly morning hits, everyone remembers their furnace and we get a big spike in service calls! By scheduling your fall maintenance early, you'll:

- Avoid the seasonal rush
- Catch small issues before they turn into expensive repairs
- Ensure your system is running safely and efficiently before it's time to switch on the heat
- Enjoy peace of mind as temperatures drop

What's Included in Fall Maintenance?:

When you schedule a fall tune-up with us, our factory trained and certified technicians will:

- Inspect and clean key components of your heating system
- Check safety controls and gas connections (if applicable)
- Test for carbon monoxide leaks
- Replace or clean filters
- Ensure your thermostat is functioning properly
- Identify worn or damaged parts before they fail

A well-maintained system doesn't just keep you warm—it also runs more efficiently, which can help lower your energy bills throughout the fall and winter.

Ready to Book?

Give us a call or book online now to lock in your preferred time for a fall tune-up. The earlier you schedule, the easier it is to find a time that works for your calendar.
